💼 Experience

Software Engineer III
Zuora, Chennai, India
Mar 2022 - Present
2 months

- Use my extensive experience with back end development to define the structure on assigned user stories along with front end development of the **React** based web application.
- Keep the code quality high reviewing code from other developers and suggesting improvements.
- Working as R&D Developer for **Presentment / Weaver** project of **Invoice** based on Zuora RevPro project.
- Currently working with **Java 8**, **Spring Boot**, **Moustache**, **Kafka**, **Rest API**, **GraphiQL**, **Microservices**.

Software Engineer
Telstra, Bangalore, India
Oct 2020 - Feb 2022
1.5 years

- Design, develop (Java), implement, and support new and existing features in the Telstra Based **SFO** Solutions (B2C) following an **Agile** Scrum Process
- Troubleshoot Production issues and Analyzed Logs using **KAFKA** Stack with deployment on cloud aka **AWS** (EC2, S3).
- Assessed newly reported issues, developing solutions for Business Requirements Using **Business Process Managers, Enterprise Catalogue, Java Microservices, SpringBoot** Framework.
- Test and deploy **docker** images to **Kubernetes**.

Developer Consultant
CSGI, Bangalore, India
Mar 2020 - Sep 2020
6 months

- Development on **SingleView** Product Application (**EPM, JavaScript, Java**) for creation of Billing and Rating User Experience.
- **Agile development** using Jira, Jenkins, GIT.
- Worked with senior software developer to understand the product and technologies used.

Software Developer
Amdocs, Pune, India
Jan 2017 - Mar 2020
3.3 years

- Developed applications and tools (Java) for Internal Customers in **SOM & ODO** 10+ (OSS) Suite, deployment tools and continuous Integration Applications.
- Analyzed Microservices logs via using **ELK** Stack - Elasticsearch, Logstash, and Kibana.
- Revamped Code as per **AGILE** practices assigned by User Stories with Techstacks like **Java, Spring MVC, Spring Boot**, and usage of **AMDOCS OSSUI** frameworks developed in JavaScript.

🔑 Key Projects / Involvements

- Conceptualised and developed Fault Tolerance web App to remediate technical impediments in Production chores, achieving > 90% reduction in time required for manual task to remediate elsewhere which was built using **Spring Boot**, **ThymeLeaf**, H2 Database, **QUARTZ CRON** Job Scheduler and Shell Script for **Telstra**.

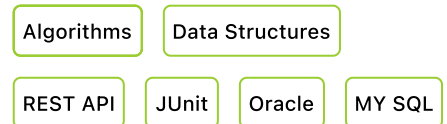

✅ Certificates and Awards

- Best performer award for consistently exceeding the performance in Telstra & Amdocs earlier.

👤 About me

Senior Java Developer with over 5.4+ Years of professional experience primarily in back-end development and beginner in front-end engineering. Passionate about innovation, efficiency, and difference. Looking to evolve to FullStack Technical Lead to face new challenges that I will learn from.

✖ Technical Expertise

Java

Spring MVC / Boot

HTML5/ CSS

JavaScript

Hibernate

✅ Skills / Exposure

Algorithms | Data Structures

REST API | JUnit | Oracle | MY SQL

🔧 Methodology / Approach

Agile methodology | Design Patterns

Test Driven Development | MVC

Event Driven Architecture

🔧 Tools

Git | Intellij | Jira | Kibana | AWS

Docker | Kubernetes | ElasticSearch

Maven

🏛 Education

CDAC *14th Feb, 2016 - 30th July, 2016*
PG- DAC
Sunbeam Pune *69.8 %*

B. Tech *2010 - 2014*
Electronics & Communication Engineering
BPUT, Odisha *6.98 cgpa*

HSC *2008 - 2010*
JAC Ranchi *61.4 %*

SSC *1996 - 2006*
DAV Public School, Jharkhand *70.5 %*
